

## Applied Microeconomic Economist

The Economic Research Department of the Federal Reserve Bank of San Francisco has a temporary opening (two year) for an economist doing research in labor, public finance, industrial organization, or investment and productivity. A Ph.D. is required. We prefer applicants with several years of academic or other professional research experience, but we will consider applications from new Ph.D.s as well. The position requires production of high-quality research for publication in academic journals and high-level analysis for presentation in Bank publications and briefings. For experienced candidates, proven research success is essential. For all candidates, excellent communication skills are required.

To apply, please submit your information and application on-line at:

[www.frbsf.org/federalreserve/careers](http://www.frbsf.org/federalreserve/careers)

You should include 1) a curriculum vitae, 2) a copy of or link to at least one research paper, and 3) three letters of reference. The Department offers an outstanding research environment and competitive salary and benefits. Information about the Research Department may be found at:
